

*A surprisingly easy way to
secure urine and blood samples*

berlinger[®] lausanne KIT

The ultimate choice for a high level, secure and easy to handle doping control procedure in the most cost efficient way. Or simply: feel safe with Swiss quality

THE SECURITY CAP

THE SECURITY CAP

- tamper proof
- once closed, sealed until opened in the laboratory
- simple and easy to close
- identified by a unique number
- leak proof
- easy handling at the laboratory
- after opening, closable for further storage
- based on the famous sealing system BEREK-KIT

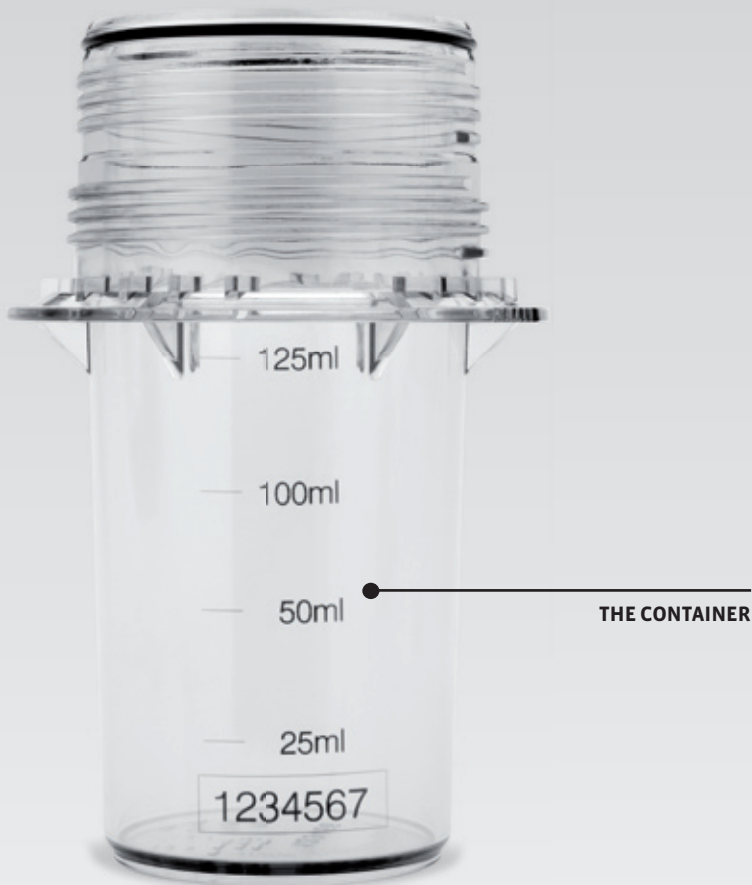

1234567

**THE PRE-SEALING
RING**

THE PRE-SEALING RING

- unique pre-sealing
- clearly identified by kit number
- tamper evident
- visibly destroyed after opening
- simple to remove
- possibility for intermediate sealing with separate pre-sealing ring (numbered)

THE CONTAINER

- uniquely identified
- provides clear visibility of the kit contents
- clearly scaled
- dual use for fluids or tubes
- wide opening for ease of use
- solid and strong
- compact storage and transport

THE KIT

- safe and secure
- unique number identification
- handy – strong – light
- compact
- tailor made
- FDA approved material
- recyclable material
- complies with IATA requirements
- optimized design for transportation and storage
- cost efficient
